

Supplementary Figure S3: Kaplan Meier analysis of quartiles according to the prognostic signature scores in the finding and validation cohorts

- A) The 394 TNBC samples from the finding cohort were stratified according to quartiles of expression of the 264-probeset signature score. Kaplan Meier analysis of event free survival of 297 samples with follow up information is shown.
- B) The 261 TNBC samples from the validation cohort were stratified according to quartiles of expression of the 264-probeset signature score. Kaplan Meier analysis of event free survival of 105 samples with follow up information is shown.
- C) The same analysis as in (A) was performed using the 26-probeset signature.
- D) The same analysis as in (B) was performed using the 26-probeset signature.
